A. Background:

The Government of Nepal, with its significant policy since the fiscal year 072/073 - 073/074 to develop basic physical infrastructure and amenity services for the overall planned development of sports activities in the country has decided to prepare Detailed Project Reports (DPR) for various prospective sports infrastructure and facilities development. Such DPR is expected, among others, to provide a holistic approach to infrastructure development for new sports facilities and amenities including the construction of earthquake resistant built structures specially in the wake of 2015-Gorkha earthquake and also to project the future infrastructural demand and need. The policy aimed at regionalization of sports activities by developing sports infrastructure in major urban growth centres is expected to add new impetus for sports development and create attraction of sports opportunities in the region.

To materialize the planned development of sports, the Government of Nepal among other several initiatives, intends to evaluate the quantity of earthwork filling of Devdaha Football Stadium. In this context, Municipality is seeking to hire separate consultancy firms for its consulting services for the preparation of said Project.

Devdaha Municipality is located at western terai of Rupandehi district intends to utilize services of engineering consulting firms well experienced in the fields of survey and design of roads, bridge engineering, river training works, environment aspects etc. for providing engineering consulting services for detailed quantity evaluation of earthwork filling in Devdaha Football Stadium.
